Executive Summary

Global Content Portfolio Performance Overview

TOTAL REVENUE
$12.8M
+18.4% YoY

PRODUCTION COST
$8.2M
30 Primary Assets

NET PROFIT
$4.6M
Margin: 35.9%

AVERAGE ROI
56.1%
Across All Regions

▲ Key Driver

The US/NA market generates over 55% of total portfolio revenue due to higher-than-average ad eCPM rates, particularly in the Drama category which achieves an 80%+ completion rate.

▼ Critical Bottleneck

The Entertainment & Lifestyle category in the APAC region experiences a net loss due to high production costs coupled with low eCPM rates and a completion rate dropping below 40%.

Regional Analytics

Region Yield & Financial Return Analysis

Region	eCPM Rate	Total Revenue	Production Cost	ROI Status
US / North America	$14.50	$7.2M	$2.5M	+180% ROI
EMEA / Europe & M. East	$8.20	$3.2M	$2.2M	+45% ROI
APAC / Asia Pacific	$3.10	$1.8M	$2.05M	-12% ROI
LATAM / Latin America	$2.80	$0.6M	$0.55M	+8% ROI

Problem Diagnostics

Deep Dive: High Views, Low Monetization in APAC

Low Ad eCPM Gap

Average ad rates in APAC range between $2.50–$3.50 per 1,000 impressions—four times lower than the US market—making AVOD (Ad-supported) models alone unprofitable.

Drop in Completion Rate

APAC viewers frequently drop off mid-stream (completion rate falls to 38%), resulting in incomplete mid-roll ad unit impressions and unfulfilled inventory.

High Production Overhead

Production costs for variety and lifestyle content in APAC exceed regional budgets, remaining unsupported by a dedicated SVOD (Subscription) revenue tier.

Strategic Action Plan

3-Phase Turnaround Framework

1. **Syndication & Licensing Out (Short-term)**
   License APAC Entertainment content rights to local platforms to instantly recoup cash and offset operational overhead.
   Recoup: +$450K

2. **Hybrid AVOD / SVOD Tier Modeling (Medium-term)**
   Restructure subscription packages in APAC to introduce hybrid models, supplementing low ad eCPMs with recurring subscription revenues.
   ARPU: +35%

3. **AI-Driven Content Budget Allocation (Long-term)**
   Utilize AI predictive scoring to approve production budgets strictly for content projected to exceed 65% completion rates.
   Cost: -20%

Projected Financial Impact

Target Metrics Following Strategy Execution (Q2 Target)
